Subject: please some response? just a quick word from Ms Flynn perhaps?

To: Selectman <selectmen@falmouthmass.us>,

Dear Falmouth MA Selectmens board,

The wind turbine issue rolls on and my health is rapidly failing. I am in the fall of the Webb turbine and am trying to make plans to have some sort of future.

I need to know if anybody is going to hear anything I have to say..or listen..

I have closed my business for next year and am just barely making it physically this season. I'm in pain and can't think clearly, I never sleep, my work is in my house. Life as I knew it is over.

I sleep in the middle of my dark basement and still vibrate and ache all the time. I have headaches all the time and the only time they stop is when I am away for 12 hours or more.

I have to leave my home because there is absolutely no possibility of any kind of restful or meaningful life here when that turbine is turning ..which is all the time.

There are occasionally a few hours it is off and I become human again... I celebrate those few hours but then they leave.

You have absolutely no idea how horrible this situation is. I cry and grieve every day for all that has been taken away here.

There is talk and talk about caring but I just don't believe you...It seems nobody actually wants to take responsibility for this horrendous mistake.

In the meantime how does Dan Webb get off having that thing paid for by grants then selling it to himself, locking it up in a limited liability corporation and dancing off with all the profits in his pocket?

Is his permit grandfathered? Is that thing up for good no matter what?

You see I don't have his millions to fight him with. I just have 6 acres and a nice unsellable home.

My life will most likely be spent in a van or a rental now because my house is toxic to me.

Whatever...I never get any answers anyway... Have a fun barbecue and sailing trip and community dinners at the Coonamessett Inn and cocktail parties, hob nobbing about and patting yourselves on the back for being "progressive". That's apparently what matters more than quality of life anyway...

I can't wait 'til my weddings are over so I can get out of here and sleep again.

MAKE NO MISTAKE THOUGH... this is YOUR mistake to correct.

Whatever... I expect the same response I always get.

Nil
